

USE-CASE FLOW SPECIFICATION

Student Startup Crowdfunding Platform

Username / USN	PES1UG24CS704	Student Name	Shreyas Gowda
Use Case	UC-03 – Make Pledge	Primary Actor	Campaign Backer

1. Preconditions

- A published crowdfunding campaign exists and is available to the Campaign Backer.
- At least one reward tier is available for the selected campaign.
- The Campaign Backer has selected an active campaign.
- The payment gateway is available for processing the pledge.

2. Postconditions

- Success: The pledge is recorded, the selected reward tier is associated with the pledge, payment is authorized, and campaign funding progress is updated.
- Failure: No successful pledge is recorded and the Campaign Backer is informed that payment failed.

3. Main Success Scenario

1. Campaign Backer selects a published crowdfunding campaign.
2. System displays campaign details, funding target, current funding progress, and available reward tiers.
3. Campaign Backer selects a reward tier.
4. Campaign Backer enters the amount to pledge.
5. System validates the pledge amount and selected reward tier.
6. System displays the pledge summary and selected reward tier.
7. Campaign Backer confirms the pledge.
8. System sends the payment authorization request to the Payment Gateway.
9. Payment Gateway authorizes the payment.
10. System records the pledge and selected reward tier.
11. System updates the campaign's funding progress.
12. System displays a pledge confirmation to the Campaign Backer.
13. Use case ends successfully.

4. Alternate Flow – Payment Declined

- 8a. Payment Gateway rejects the payment authorization.
 - 8a1. System displays a payment failure message.
 - 8a2. System asks the Campaign Backer to retry or choose another payment method.
 - 8a3. Campaign Backer retries the payment.
 - 8a4. If payment succeeds, the system records the pledge and resumes at Step 10.
 - 8a5. If payment fails again, the system cancels the pledge attempt and informs the Campaign Backer.
